Impact of Journal Capacity $K$ on Internal Equilibrium $x^*$

Legend:
- High Capacity ($K = 269.2$): $x^* \rightarrow 0$
- Medium Capacity ($K = 99.9$): $x^* \approx 0.786$
- Low Capacity ($K = 53.9$): $x^* \rightarrow 1$

X-axis: Proportion of "Only Good" Authors ($x$)

Y-axis: Replicator Dynamics $\dot{x}$

Annotations: $x^* \rightarrow 0$, $x^* \approx 0.786$, $x^* \rightarrow 1$
